

Mixing Instructions

The amprolium 2.5% Type B crumbles/pellets are mixed with non-medicated feed to produce Type C medicated feeds in the range of 0.0125% to 1.25% amprolium. The table below gives suggested directions for feeding CORID 2.5% Medicated Feed.

Note: There are approximately 11,340 mg of amprolium in every 1 lb of CORID 2.5% Medicated Feed.

% Amprolium Type C	Quantity 2.5% Type B (lb)	Quantity Non-medicated Feed (lb)
0.0125	10	1990
0.0167	15	1985
0.0250	20	1980
0.0500	40	1960
0.1000	80	1920
0.2500	200	1800
0.5000	400	1600
0.7500	600	1400
1.0000	800	1200
1.2500	1000	1000

**Important Safety Information: Withdraw 24 hours before slaughter.
Do not use in calves to be processed for veal.**
